

ITEMS: I48, I76

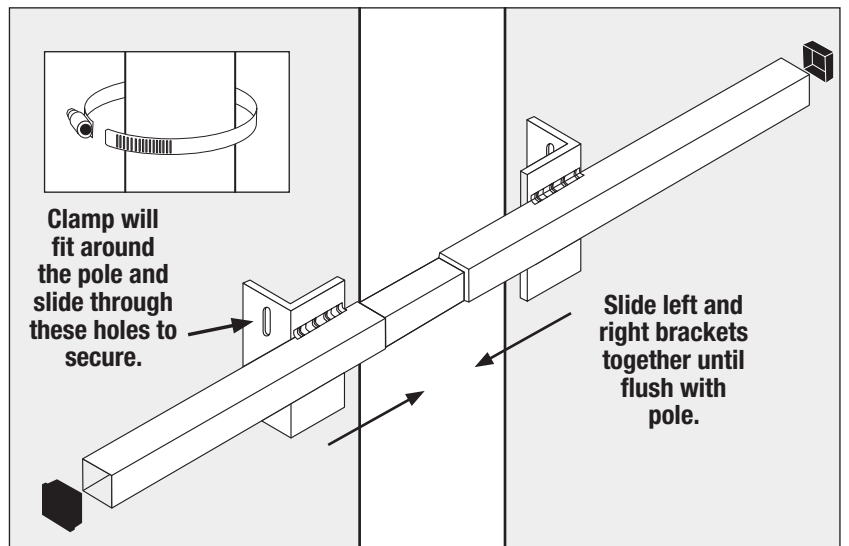

# Pole Banner Interceptor Brackets

## Parts Include:

- A. 1 Right Flag Bracket
- B. 1 Left Flag Bracket
- C. 2 Adjustable Clamp Straps
- D. 2 Plastic End Caps

## Bracket Assembly:

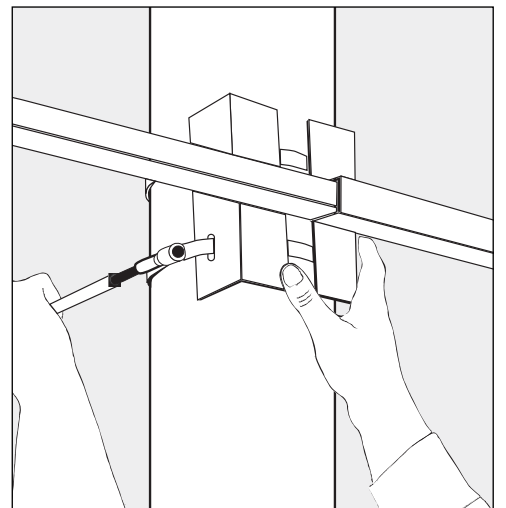

**1.** Insert a plastic End Cap (D) into the open (outside) end of each Bracket (A, B). This will help keep your flag or banner from sliding off the pole in windy conditions.

**2.** Insert the tapered end of the Left Bracket (B) into the Right Bracket (A) and place them against the pole where you are installing them.

**3.** Wrap a metal clamp strap (C) around the pole and through the top hole on each bracket plate (A,B). Tighten the screw on the metal strap with a screwdriver until the strap has a firm hold on the pole. Repeat with the second strap through the bottom holes on the bracket plates.

**4.** Slide the your flag or banner onto the extended end of the square pole(s) and you're done!

## GREAT AMERICAN'S INTERCEPTOR BRACKETS:

- ★ Assembles in minutes!
- ★ Made of powder-coated steel for long lasting use
- ★ 2 Brackets are required for hanging flags and pole banners
- ★ Fits any pole up to 7" diameter
