

# Pre-Programmed Sticker Printer

Sticker Printer System  
KPTR202

## GREAT AMERICAN'S STICKER PRINTER:

- ★ Printer is preprogrammed — ready to use right out of the box
- ★ Stickers won't smudge!

### Getting Started:

1. Unpack printer. Plug the power cord (C) and keyboard (B) into the back of the Sticker Printer (A).
2. Turn on printer (button underneath the LCD display). Allow printer to boot up (about 20 seconds), press any key to continue.
3. Press ENTER on the keyboard to Recall Label.
4. Press ENTER on the keyboard to select the "Oil Change" form.
5. When prompted for Current Mileage, enter the vehicle's current miles.
6. When prompted for Next Miles, enter how many miles until customer will need their next oil change: e.g. 3000, 5000, etc.
7. When prompted for Next Change, enter the number of days until next oil change: e.g. 90, 180 days, etc.
8. When prompted for Oil Type/Weight, enter your desired message: e.g. 10W30, Mobil1, etc.

### Ribbon Storage Recommendations:

1. To ensure optimal performance, ribbons may be stored for up to one year between 5°C (40°F) and 35°C (95°F) and in 20-85% relative humidity.
2. Avoid storing in direct sunlight or in an area exposed to the elements.
3. For optimal print results, thermal transfer printing should occur at the environmental operating conditions determined by the printer manufacturer.

### Sticker Printer System Includes:
