

# Windshield Pull Bows

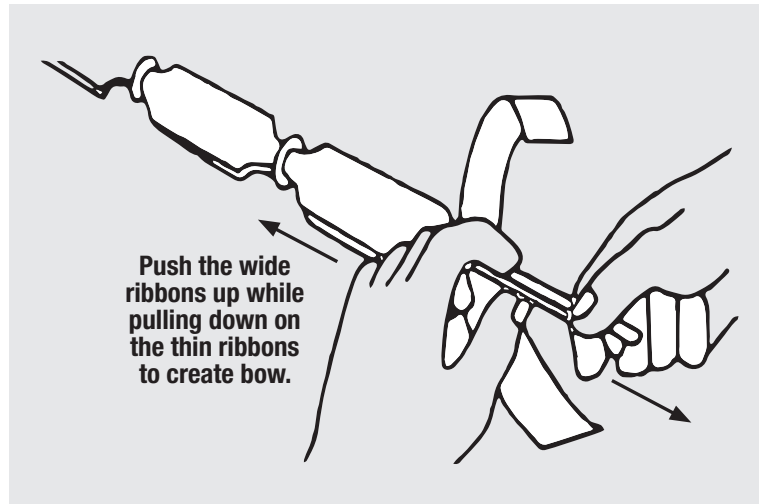

Showroom  
Pull Bow  
SPB

## Each Bow Includes:

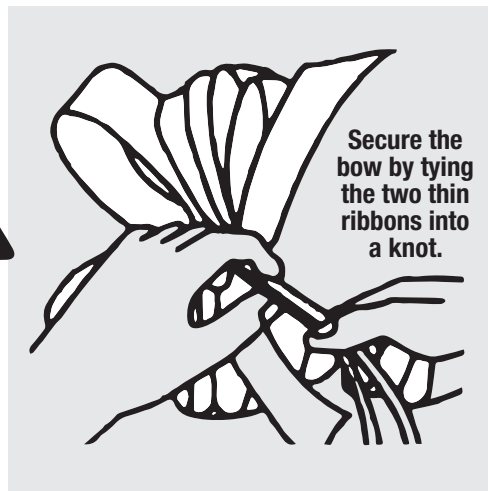

- A. 1 12" diameter Windshield Bow with two 8" tails
- B. 1 Suction Cup

## GREAT AMERICAN'S SHOWROOM BOWS:

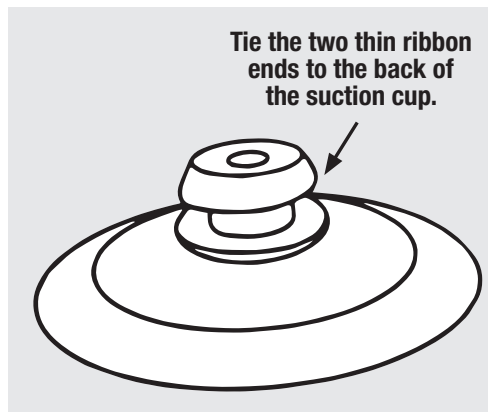

- ★ Dress up your showroom for the holidays or special events!
- ★ Mix and match colors for quantity discounts!
- ★ Assembles in seconds!

**1.** Unfold the bow and locate the two thin ribbons between the bow tails. Hold the ends of the thin ribbons together with one hand and start pulling them towards you while pushing the large ribbons away with your other hand. The loops will automatically arrange themselves into a bow as you pull the strings.

**2.** Do not let go of the looped ribbons while you tie the two thin ribbons into a knot to hold the bow in place. The knot will keep the bow from falling loose and disassembling.

**3.** Tie the two thin ribbon ends around the knob on the back of the suction cup. Trim off excess ribbon and attach suction cup to windshield.

**Note:** Bows recommended for indoor use only.
